

#### Subtítulo Curto do Caso de Sucesso

Visionnaire and the Piraquara City Hall had a successful partnership from 2013 to 2023. Visionnaire was responsible for updating the Piraquara City Hall portal, replacing static pages with a new, modern, and technologically updated portal.

After the implementation of the new portal, the Piraquara City Hall faced the challenge of making its communication even more accessible and modern for the population, keeping it updated through a portal up to date with the latest web trends.

Visionnaire was hired again to renew the Piraquara City Hall portal, adding resources that were not previously available, such as video tools and a Content Management System (CMS), which facilitated content updates for all municipal secretariats.

The renewal of the Piraquara City Hall portal made it even more dynamic, interactive, and visually appealing, following modern web standards.

The population of Piraquara had access to a more beautiful and easy-to-navigate portal, with a new design and new content layout.

The implementation of the Visionnaire's WebPublication was fundamental to dealing with the large volume of information and the constant need to update the Piraquara City Hall portal.

Other technologies used include integration with other systems through the Java language, Windows operating system, HTML5, CSS3, Apache Tomcat, XML, XSL, XSLT, JSP, JavaScript/Ajax/DWR, jQuery, and Microsoft SQL Server database, WEB IIS server, UML modeling, and the use of the MVC pattern.

The renewal of the Piraquara City Hall portal not only benefited the city hall, providing more content and reaching the population more effectively, but also benefited the population, who now have access to a more modern, beautiful, and easy-to-navigate portal.
