VISIONNAIRE

Success Case

Improvements to Microsoft SharePoint System and Portal

Problem

AngloGold Ashanti needed to evolve a legacy Microsoft SharePoint portal developed by a third party and used by suppliers. At the time, the portal was used only for payment consultation.
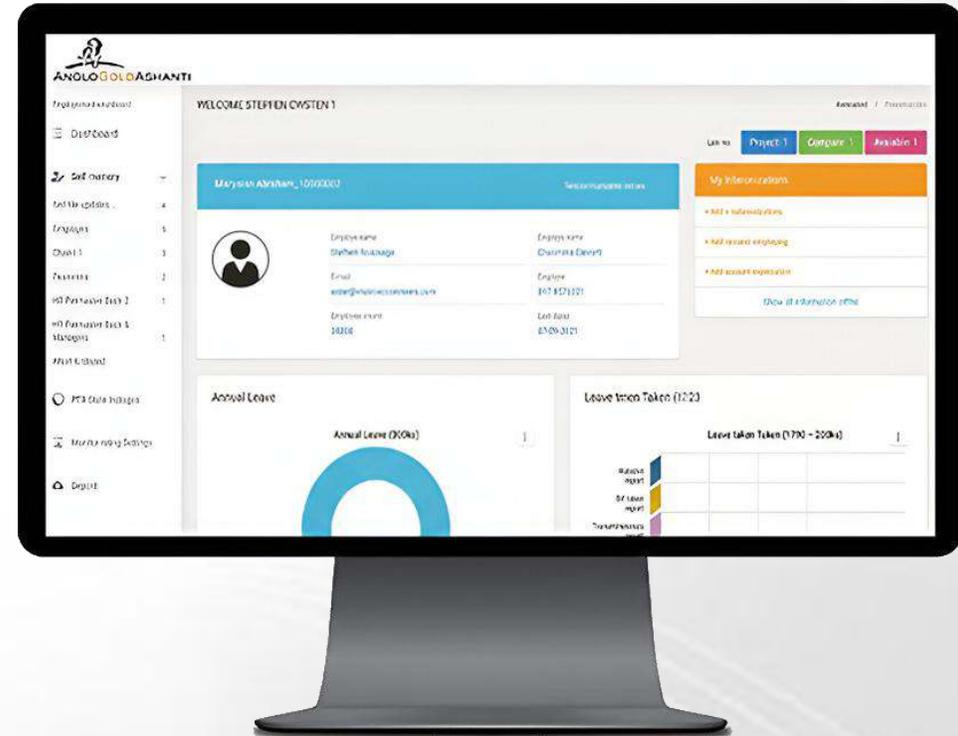

Solution

Visionnaire addressed AngloGold Ashanti's demand through a structured, technical, and incremental approach, grounded in its experience with Microsoft SharePoint and the use of agile methodology (Scrum).
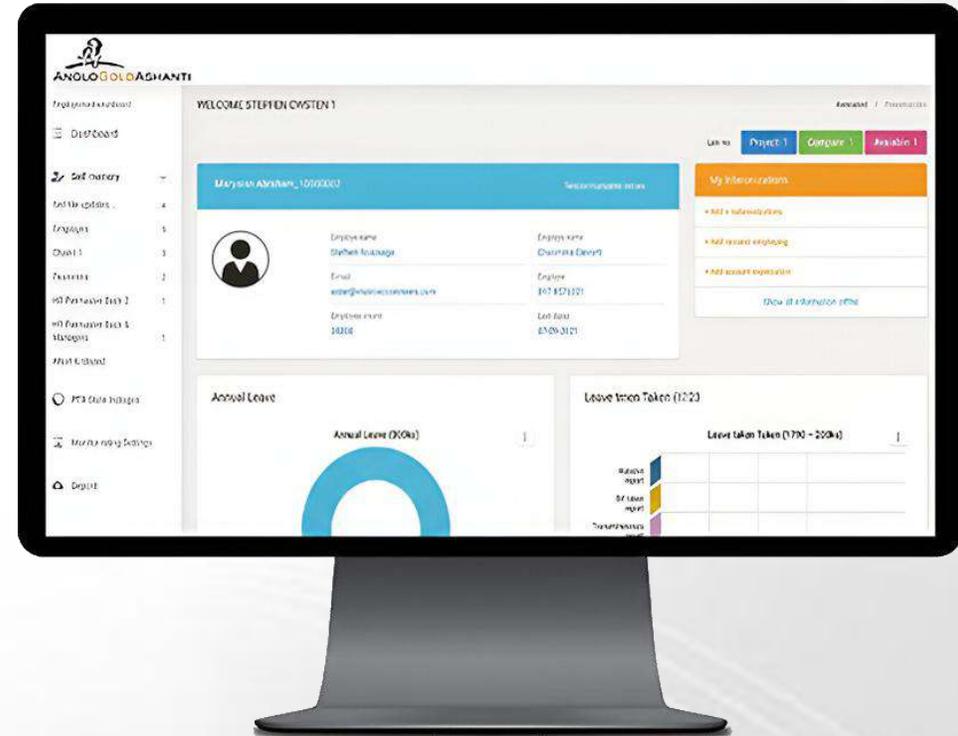

VISIONNAIRE

Results

AngloGold Ashanti gained more standardized processes, reduced reliance on manual controls, and clearer flows for supplier registration, payment consultation, and form usage.
