## **Success Case**

Allocation of a professional to continue the development of an existing system

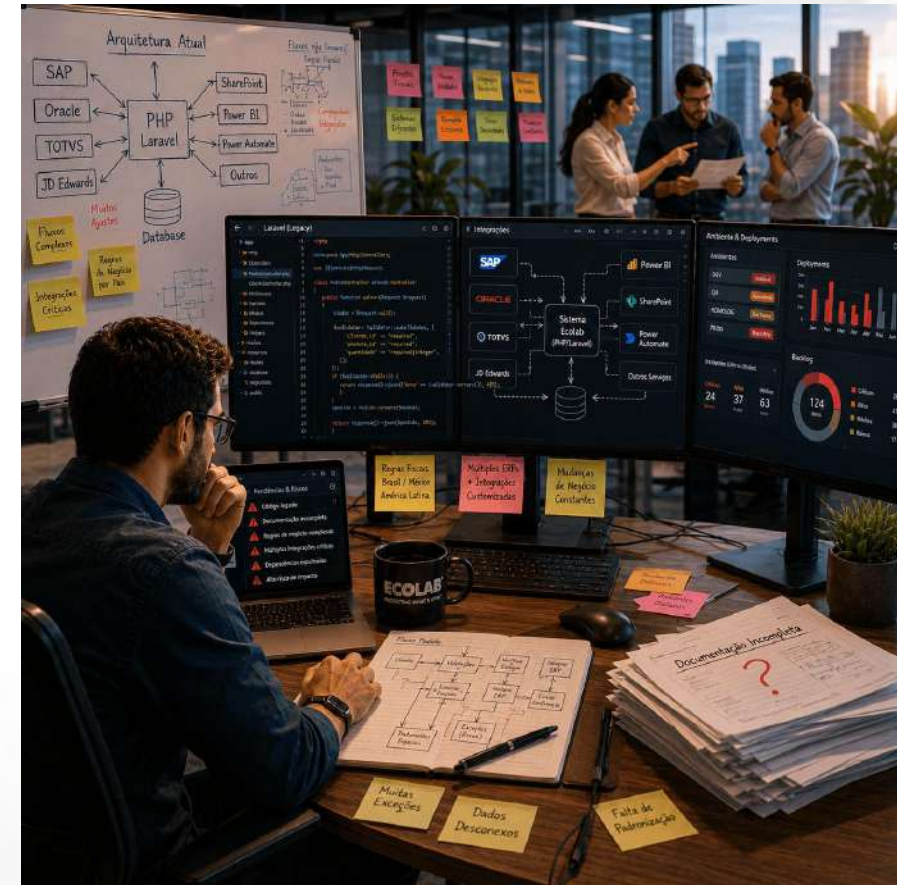

# Problem

Ecolab needed to rapidly expand its technological capabilities to support digital transformation projects in Latin America, especially in Brazil. With demands in Business Intelligence, Power Platform, automation, systems integration, and standardization of ERPs such as Oracle and SAP, the company sought partners specializing in IT outsourcing.

# Solution

Visionnaire proposed to Ecolab an IT outsourcing solution based on the allocation of specialized professionals to support digital transformation projects, focusing on mid-level and senior professionals integrated into the company's teams or working in complete development cells.

# Results

Visionnaire helped Ecolab accelerate its digital transformation, increase its IT operational capacity, and standardize corporate processes and technologies. The client was able to rapidly expand the delivery capacity of its technology department.

The Ecolab logo consists of the word "ECOLAB" in a bold, blue, sans-serif font. The letter "O" is replaced by a blue circle containing a white four-pointed star. A registered trademark symbol (®) is located to the upper right of the "B".

**ECOLAB**®
