

VISION/AIRE

Success Case

Requirements development for the modernization
of refrigerators with smart sensors

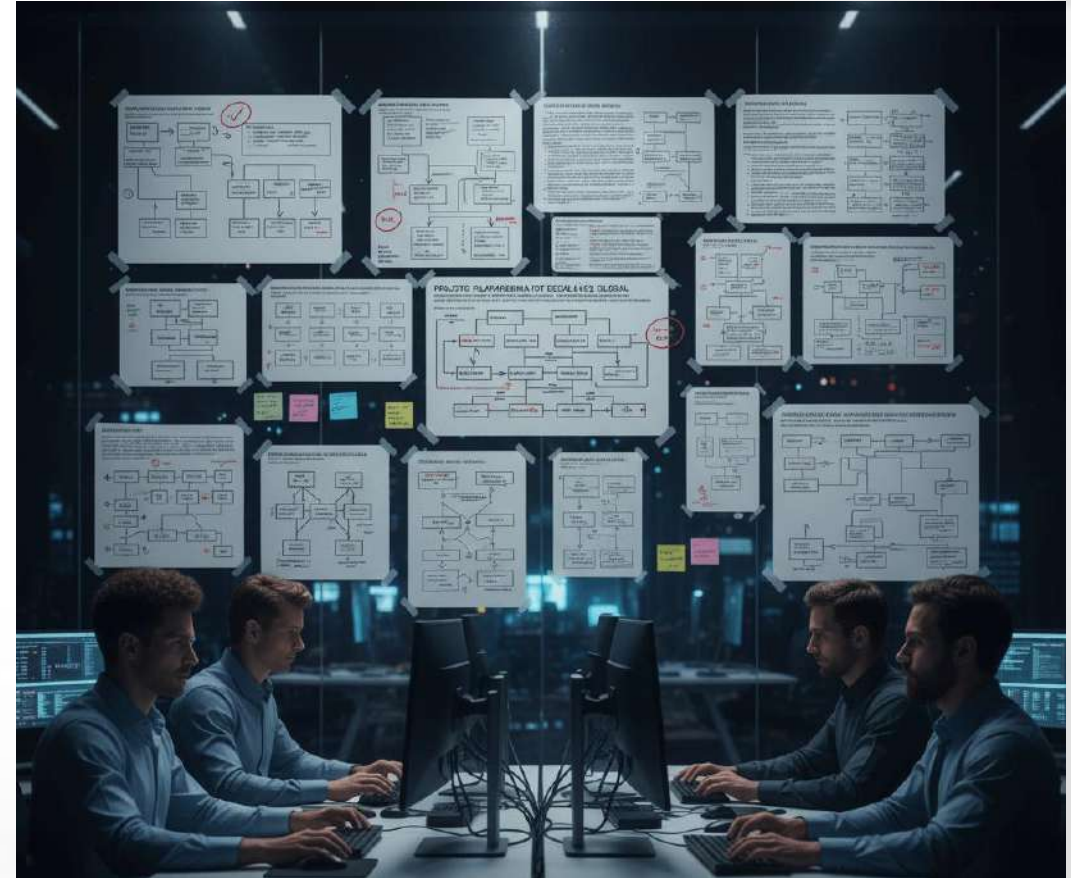

Problem

Embraco wanted to innovate through digitalization and partnered with Visionnaire in an IoT (Internet of Things) project aimed at the commercial refrigeration market.

Solution

Visionnaire, already established as an innovative company with experience in IoT, Cloud, and mobile applications, proposed a modern solution that combined smart sensors, Cloud communication, and applications for distributors and sales representatives.

Results

Embraco took concrete steps towards digitalizing its products with IoT and developed robust documentation and architecture with Visionnaire, even launching IoT-based solutions as early as 2017.
