**Success Case**

FIEP - Extranet

# Problem

Federation of Industries of the State of Paraná (FIEP) needed to offer a way for all its employees, in the most diverse cities of Paraná, to communicate and integrate in an agile and effective way through an internal and external corporate extranet system.

# Solution

With an attractive and cognitive visual communication, developed in partnership with the marketing department of FIEP, the external system in WebPublication became agile, effective, and easy to collaborate.

# Results

By the end of the project, around 8,000 people in different cities were able to integrate via an intranet with a better flow of information and more productivity in the communication with employees by the board and between sectors and departments.
