

VISIONNAIRE

Success Case

Creation and Maintenance of Sistema FIEPE
(FIEPE System) Portals

Problem

Need, by the Federação das Indústrias do Estado de Pernambuco – FIEPE (Federation of Industries of the State of Pernambuco), to standardize the structure of four different sites with a single solution.

Solution

The planning, execution and delivery of the Social Service of Industry of Pernambuco website were a complete success, thanks to the characteristics of the WebPublication© tool.

Results

The main benefit provided by WebPublication© was to transfer the total management of content to the marketing and journalism teams of the FIEPE System.
