

VISIONNAIRE

Success Case

Fertipar Paraná – Systems
Development Consulting

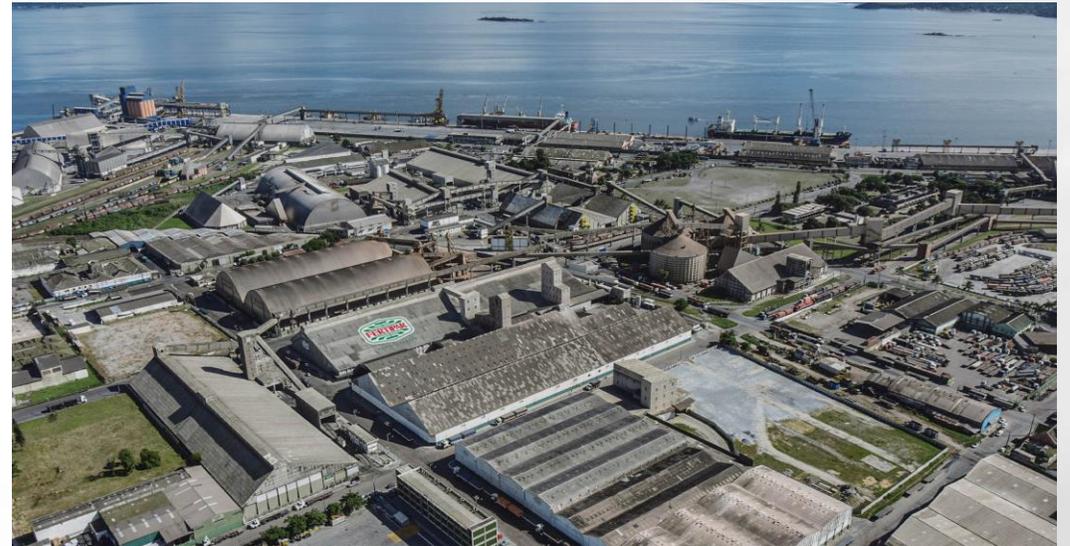

Problem

Fertipar Paraná had already mapped problems in a Java application running on two WildFly application servers. It was necessary, according to the analysis made, to promote four improvements, that is, to evolve a system with new functionalities, optimizations and resources according to the identified needs.

Solution

Visionnaire promoted the execution of the four improvement points in partnership with Fertipar Paraná employees, within the company's headquarters, and with the aim of development mentoring. Fertipar Paraná was successful and promoted evolutionary improvements in its application.

Results

The four points for improvement previously raised by Fertipar Paraná were carried out through specialized consulting promoted by Visionnaire.

All four points were fulfilled, resulting in a remarkable evolution of the company's application.
