

VISION/AIRE

Success Case

GVT – Development
Outsourcing

Problem

GVT had a high demand for project development in the telecommunications area, with the need for specialized personnel in the technologies used by the company.

Solution

Visionnaire, through several years of relationship with GVT, helped in the development of various systems and in the service of personnel specialized in GVT technologies.

Results

With the development of the various systems for many years, Visionnaire helped GVT to reach a prominent position in the national market, with a presence in 20 states, high levels of quality and high acceptance rates by its customers. In 2016, GVT was integrated with Vivo.
