

VISIONNAIRE

Success Case

Perkons – Development Outsourcing

Problem

Perkons is a company that develops and applies technology for traffic safety. Due to a need to expand its technical staff, it required professionals highly qualified in Information Technology (IT).

Solution

Visionnaire, through a partnership of years, solved the need with managers, software architects and testers to develop and deploy systems. In a few months, Visionnaire provided a highly qualified team that started developing and delivering systems to generate productivity for Perkons.

Results

With the Visionnaire professionals who were added to the Perkons team, it was possible to carry out the necessary development and integration of traffic safety systems, contributing to a more humane and safer traffic.
