VISIONNAIRE

Success Case

SECOVI-PR – Portal

Problem

Create a new internet portal for SECOVI-PR in a fast and productive way, and at a competitive cost, that included all units of the Secovi System (UNIHAB, INESPAR, SECOVIMED, CMA-PR and Chave Fácil), and that allowed content inclusion through a content management tool, without the need for technical staff.

Solution

The Visionnaire WebPublication platform was used, which allowed, in record time, with the use of templates, all sites to be online, at a low cost of implementation, and with the content being published by non-technical personnel.

VISIONNAIRE

Results

With the solution deployed by Visionnaire, it was possible to integrate all SECOVI-PR portals in record time, at a competitive cost.
