VISIONNAIRE

Success Case

System for Sales Processing in Various Establishments
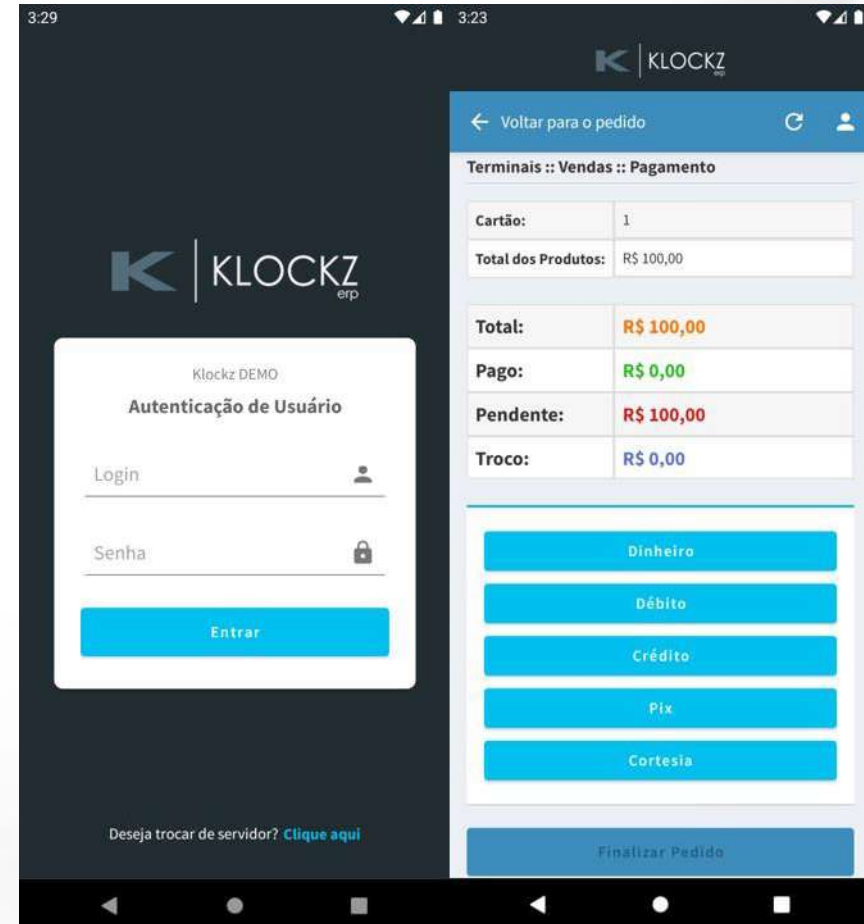

Problem

Create a system designed to facilitate sales transactions targeted at businesses that operate primarily at night. It was essential that this system could be incorporated directly into the establishments' points of sale.
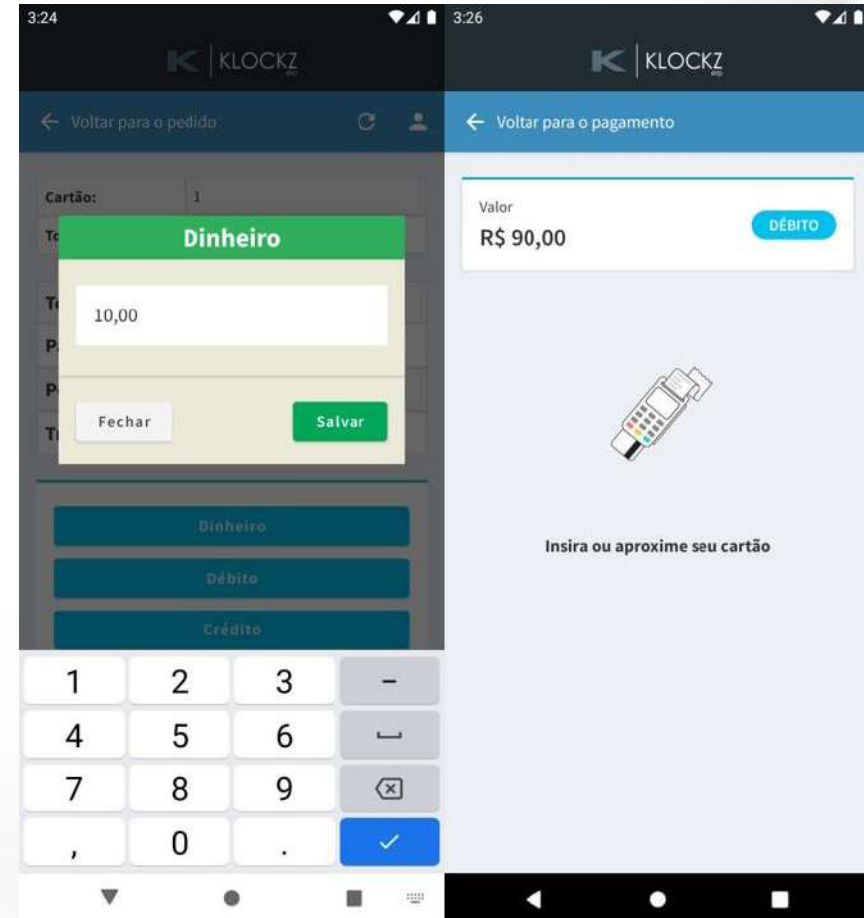

VISIONNAIRE

Solution

Through outsourcing of IT professionals and great ability to adapt to customer needs, specialist developers from Visionnaire led the creation of the system in question according to Soflinc's demands.

Software Development
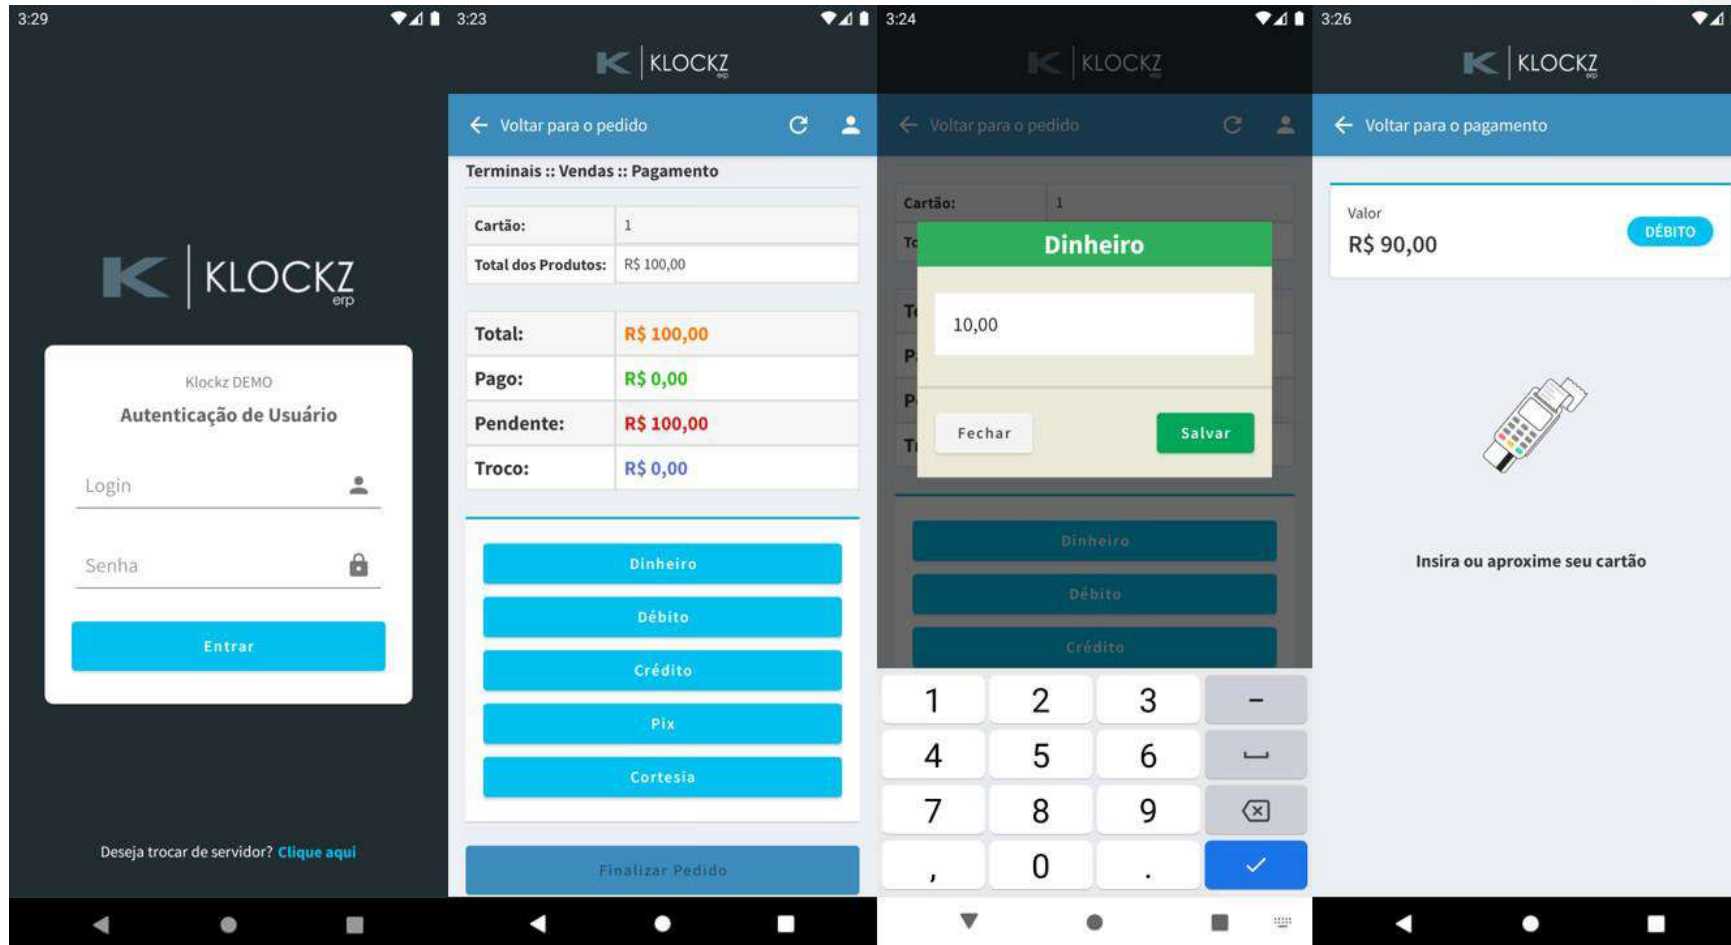

Professional Services

VISIONNAIRE

Results

The system developed by Visionnaire for Soflinc with Kotlin technology works directly on card machines and is approved by Brazilian payment methods fintech Stone. Therefore, it offers different payment methods: cash, debit, credit, PIX and even courtesy.
