

VISIONNAIRE

Success Case

Unimed Curitiba –
Applications / Mobile
Solutions

Problem

Unimed had the need to facilitate the way in which its clients looked for information and exam requests, and adapted the new technological realities geared towards digital transformation, thus giving the first step to this inevitable change.

Solution

Visionnaire was responsible for developing a family of apps that run on a robust and secure platform, allowing greater agility on the part of Unimed's clients. This solution was developed for Android and iOS platform, unifying various information in three applications

Results

With the new family of mobile applications (apps) developed in partnership with Unimed, its clients and medical doctors enjoy several functionalities, all integrated with Unimed's main services.
