

VISIONNAIRE

Success Case

Creation and development of
Univision Health Tech

Problem

Need, on the part of Unimed Curitiba, to be present in the digital environment so as not to lose ground in the midst of the Mobile Revolution. Agility was needed, as the market was growing fast, and the company could not fail to offer mobile solutions to its thousands of customers.

Solution

On one hand, Visionnaire's technological *expertise*; on the other, the medical *expertise* of Unimed Curitiba. The result was Univision, a Health Tech responsible for creating innovative solutions for health and wellness.

Results

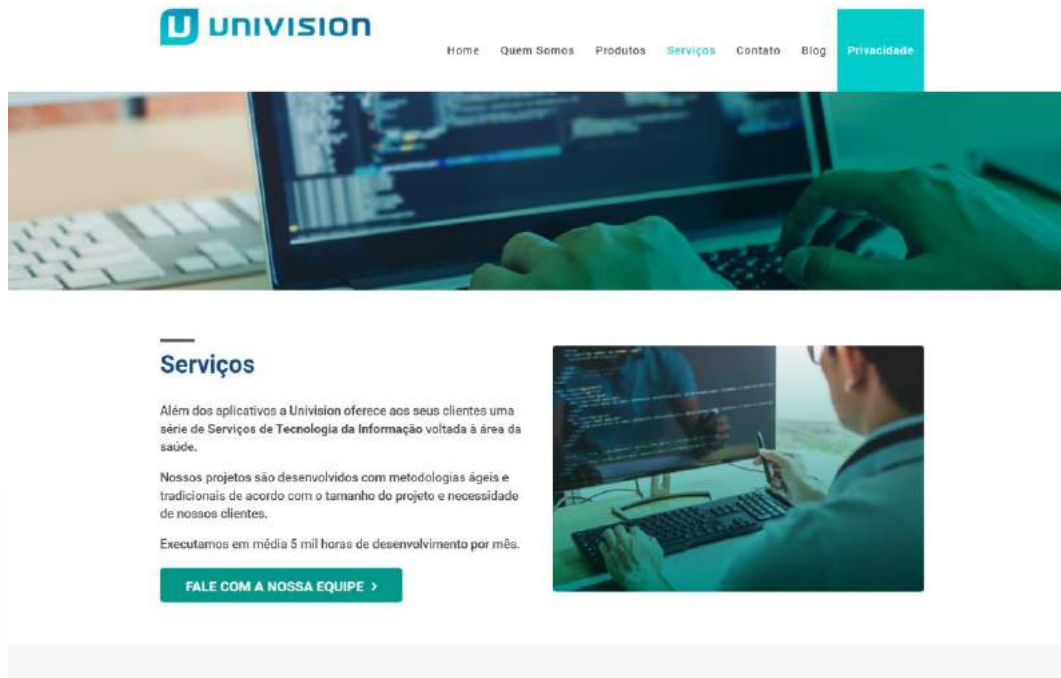

Visionnaire and Unimed, together, transformed an innovative idea into a company that, today, successfully walks on its own legs.
